Aspire to be an Entrepreneur?  
Participate in a mini-hackathon and learn how to build the next sustainable idea!

# Innovations in Smart Agriculture: a Training Program for digital skills and Entrepreneurship

Green  
**STEAM**  
Incubator

### Join us to learn:

- How to create collaborative affiliations among youth organisations, building fun microcontrollers using Arduino electronics based on the training Handbook we developed on eco-friendly agricultural solutions and learning how to design environmental products using 3D Design software!
- The latest developments in the field of AgroTech from experts, build exciting electronic circuits and 3D-print your own designs!
- The educational material of the Green STEAM Incubator Project that you can use to train Youth!
- How to build your idea using entrepreneurship/business development tools!
